Konfiguracija elektronske pošte
(Windows Mail)

Da bi Windows Mail pravilno funkcionisao, osim vašeg korisničkog imena, potrebno je da znate i podatke o e-mail serverima. Te podatke dobili ste prilikom registracije, te ih treba upisati u Windows Mail klijentu.

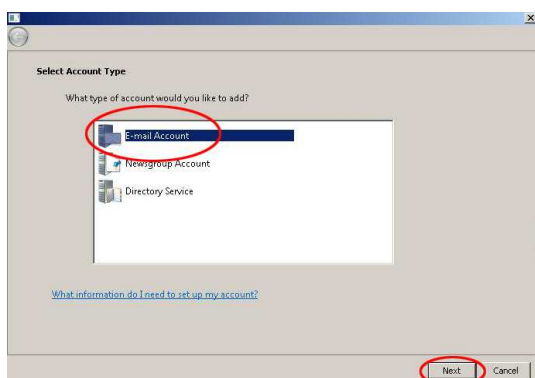

1. Pokrenite **Windows Mail**

2. Birajte opciju **Tools**, zatim **Accounts...**

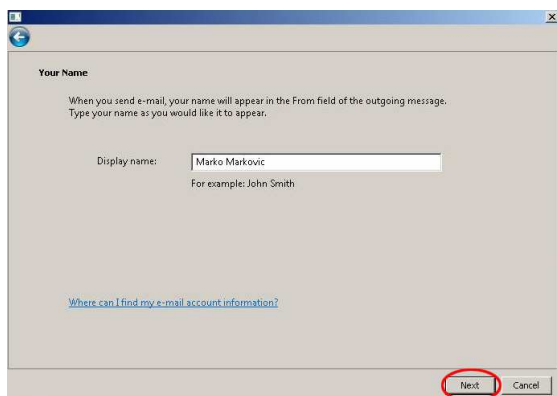

Kliknite na **Add...**

3. Birajte **E-mail Account**

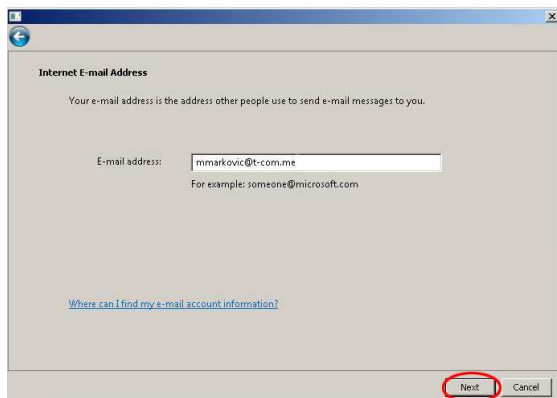

Kliknite zatim **Next >**

4. U **Your Name** unesite svoje ime i prezime (npr. Marko Markovic).

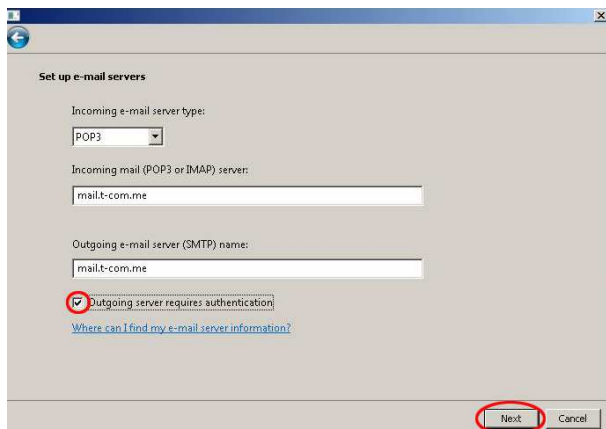

Kliknite zatim **Next >**

5. U **E-mail Address** upišite svoju e-mail adresu kod Crnogorskog Telekomu (taj podatak dobili ste pri registraciji), npr. mmarkovic@t-com.me.

Kliknite zatim **Next >**

6. U **Incoming mail (POP3 or IMAP) server** upišite **mail.t-com.me**. U **Outgoing e-mail server (SMTP) name** upišite **mail.t-com.me**. U cilju povećanja bezbjednosti mail sistema, uvodi se **SMTP** autentifikacija. Štrikirajte **Outgoing server requires authentication**.

Kliknite zatim **Next >**

7. U **Password** upišite lozinku za primanje i slanje e-maila (taj podatak ste takođe dobili pri registraciji). Umjesto lozinke, na ekranu će se pojavljivati zvjezdice.

Internet Mail Logon

Type the account name and password your Internet service provider has given you.

E-mail username: mimarkovic

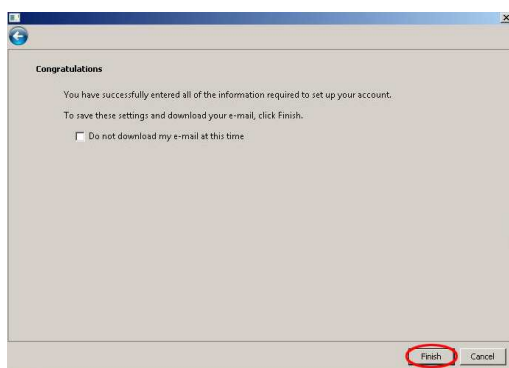

Password: *****

Remember password

Next Cancel

Kliknite zatim **Next >**

8. Otvara se prozor **Congratulations** sa obavještenjem da ste uspješno upisali parametre. Kliknite na **Finish**.

Congratulations
